

## About Us

We are the original Master Floor company. The original Master Portable Dance Floor was designed and patented by Dale Buse in 1995. Dale's years of experience in the music and dance industry coupled with his knowledge of construction and design led to the creation of the premiere portable dance floor in the Hospitality and dance industries.

After retiring from the business for some years, Dale is once again heading up production and pioneering new products. Dale is committed to serving his customers with care and integrity while producing a product of quality and value. Each Master Portable Floor is guaranteed for 3 years against manufacturing and material defects.
