{xtypo_quote} ...it gets 4 – 5 hours a day of practice on it and in spite of hard use, the floor is still in excellent shape. We have had nothing but top service from it. It’s fast, the amount of spring is perfect and it’s a pure joy to dance on. We’ve noticed that it’s the same floor that’s used at many competitions. ~John Beuerman {/xtypo_quote}

Premium Grade Hardwoods

- Unique Flex Action
- No Movement or Seraration
- No Exposed Metal
- Cost Effective
- Smart Cart for Easy Storage

Premium Grade Hardwoods

Each Master Portable Dance Floor is crafted from premium grade hardwoods bonded to a finished Birch substrate. Our panels are substantial in size, 46" X 46" and 39 lbs with a multi-layer, UV cured Urethane coating. These floors are Heavy Duty and designed to last through years of performances and events. All our products are guaranteed for 3 years against material and manufacturing defects.

Transition pieces are produced of PVC poly material for easy and precise assembly. The underside of panels are sealed to protect against moisture and mildew. Each Master Portable Dance Floor panel is guaranteed for 3 years against manufacturing and material defects.

Unique Flex Action

Master Portable Dance Floors are designed to provide ideal flexing action for effortless dancing. Invisible to the eye when installed, the flex action is recognized as a benefit to dancers and event planners alike. Your guests will say they could have danced all night!

No Movement or Separation

Each Master Portable Dance Floor panel rests on an engineered, patented connector plate designed and patented in 1995, proving you with a worry free event.

No Exposed Metal

Master Portable Dance Floors have no exposed metal edges or borders. Each panel connects securely guaranteeing a smooth surface free from safety hazards that could catch a heel or cause dancers to trip and fall.

Cost Effective

Master Portable Dance Floors are easy to assemble, store and move. Using patented connector plates, panels have no mechanical connections or screws. Assembly time is slashed and the necessary manpower is reduced. Master Portable Dance Floors are larger (46" x 46") but weigh half as much per square foot as other floors.

Smart Cart for Easy Storage

The Master Portable Dance Floor SMART CART is constructed of heavy gauge steel and treated with a hard powder coat finish to ensure strength and durability. Each cart has heavy duty ball bearing wheels making the Smart Cart easy to maneuver and store. Designed to hold and store up to 25 panels, the Smart Cart provides ideal protection and transport for your Master Portable Floor panels.
